

ESPECT Security Assessment Report

IPsec Analysis

Property	Value
IP Version	ipv4
IKE Detected	True
IKE Version	IKEv2
IKE Exchange Types	IKE_SA_INIT, IKE_AUTH
IKE Encryption	aes128-gcm16
IKE Integrity	Unknown
IKE PRF	sha256
IKE DH Group	modp2048
ESP Detected	True
ESP Packets	488
ESP Bytes	116144
ESP SPIs	3288972894, 3308204186
ESP Encryption	Unknown
ESP Integrity	Unknown
ESP PFS	Unknown
Source Addresses	192.168.160.128, 192.168.160.129
Destination Addresses	192.168.160.128, 192.168.160.129
IPsec Mode	transport

Traffic Classification

Property	Value
Predicted Traffic Type	voip
Confidence	0.9967

Security Assessment

Property	Value
Security Score	85
Status	WARNING

Security Findings

1. Transport mode detected

Severity: INFO

The IPsec tunnel is operating in transport mode.

Recommendation: Use tunnel mode when full IP packet encapsulation is required.

2. IKE integrity could not be determined

Severity: MEDIUM

The integrity algorithm used during IKE negotiation could not be identified.

Recommendation: Verify the configured IKE integrity algorithm.

3. ESP encryption could not be determined

Severity: MEDIUM

The ESP encryption algorithm could not be determined from the captured traffic.

Recommendation: Verify the configured ESP encryption algorithm.

4. ESP integrity could not be determined

Severity: MEDIUM

The ESP integrity algorithm could not be determined from the captured traffic.

Recommendation: Verify the configured ESP integrity algorithm.
